

## *Les Ponts d'Ouvre*

Only 10 minutes from our B&B is the popular Regional marshland park with its new visitors center. It is so popular that it is necessary to book in advance for their boat trips.

The Barbey d'Aurevilly II boat will take you on a tour around the marshlands where you will discover the mysterious world of the Marais du Cotentin, one of the largest wetland ecological places of interest in Europe

The second boat the Rosee du Soleil that has 50 seats leaves from the river Taute to discover the world of the marshlands. From both boats you will see the migrating birds and other wildlife.

There is also a nature trail on foot of about 1 kilometre winding through meadow landscape along a stretch of water with observatories to see the marsh birds in their natural environment.

There are also many walkways that take you through natural hedgerows created in the middle ages by farmers and religious pilgrims.
